Full Remote

EXPERIENCES .

Senior Full-Stack developer - Agicap (Freelancing)

Jan 2022 - Present - 1/2 year, Full Remote

Developed the main API for the cash collection team following Domain Driven Design principles and CQRS technical patterns along with an Angular micro front-end application integrated to Agicap's core system. Implemented Gitlab CI/CD pipelines for continuous delivery and deployment on a K8S cluster through argoCD.

Senior Full-Stack developer - Pingflow

March 2020 - Jan 2022 - 2 years, Full Remote

Re-architected the legacy data processing service to enable better scalability and reduce hosting costs by transitioning from a Scala monolith to individual Go microservices. Architected and implemented a series of services able to remotely control chromium instances on distant hardware.

Full-Stack developer - Vestiaire Collective

Oct 2019 - March 2020 - 1.5 years, Paris & Tourcoing, France

Architected and developed a custom CMS along with an Angular component library and a custom backoffice with live preview in order to dynamically serve targeted content to the end user according to a series of predefined criterias. Improved the continuous integration of the main application, reducing its built time by a factor of 4. Migrated data from the legacy system to the new CMS through a series of golang scripts and web crawlers and improved the response time by a factor of 10.

Full-Stack developer - Niji

Dec 2017 - Oct 2019 - 1 year, Lille, France

Lead Front-End developer for an Angular Universal application (SSR). Architected and developed a job matching platform using NextJS, ReactJS and NodeJS. Supervised junior developers during the development of a realtime visual management application.

Fullstack web developer - La Mobilery

Sept 2017 - jul 2017 - 4 months, Lille, France

Developed a chatbot for LaRedoute along with a PWA application for Eurotunnel and various e-commerce websites.

Co-founder and Full-Stack web developer - We Feed The Troll

Sept 2014 - jul 2017 - 3 years, Valenciennes, France

Designed and developed various projects mainly based on MEAN or LAMP stacks along with hybrid mobile developement using Ionic for the account of different clients (Suez , Lotus, Maxxing etc...).
